Company: AIG

Location: dubai

Category: other-general

Oil & Petrochemical & Chemical Risk Engineer | AIG Dubai

AIG is the marketing name for the worldwide property-casualty and general insurance operations of American International Group, Inc. All products and services are written or provided by subsidiaries or affiliates of American International Group, Inc. Products or services may not be available in all countries and jurisdictions, and coverage is subject to underwriting requirements and actual policy language. Non-insurance products and services may be provided by independent third parties. Certain property-casualty coverages may be provided by a surplus lines insurer. Surplus lines insurers do not generally participate in state guaranty funds, and insureds are therefore not protected by such funds.

As an AIG risk engineer, you'll be joining a highly experienced global team with a mission to use their industrial experience to provide underwriters with expert risk selection guidance to support profitable underwriting of our oil & petrochemical (O&P) & chemical business.

Oil & Petrochemical & Chemical Risk Engineer | AIG Dubai | [Apply Now](#)

You will:

Develop & manage risk engineering field survey programmes

Perform operational and construction field surveys of our client's O&P and chemical sites:

meeting client representatives of all departments to verify risk mitigation approaches

advising clients with loss prevention recommendations

where leading the survey, presenting survey results to site management focusing on the risk analysis and recommendations, decision-making processes & conclusions

writing internal & market reports in an accurate and timely fashion using AIG risk rating tools,

report formats, loss estimation methods & software

Advise clients on how to improve the risk quality of their organisations by influencing site and corporate loss prevention practices

Analyse AIG & third-party field survey reports by reviewing, interpreting, and summarising the risk information

Present and explain your conclusions clearly and concisely to your underwriters providing them with the engineering knowledge to support profitable underwriting.

Key Measures/Dimensions

Strong interpersonal, verbal and written communication skills (languages an advantage) in diverse environments

Strong organisational and analytical skills

Able to work independently and in a multi-disciplinary team environment

and undertake global international travel for up to 90 days per year

and lead surveys at industrial facilities & deliver reports to strict deadlines

Enthusiastic learner committed to maintaining expertise through practice and continuing professional development

Keen to understand the root causes of industrial disasters & to use that understanding to help your clients and underwriters avoid them

Technical Skills/Competencies

Chemical engineering degree. Ideally Chartered (or working toward)

Good technical engineering & industrial experience

Knowledge of engineering concepts, standards, practices, procedures, and techniques

Good knowledge of the application of Process Safety Management

Other working languages will be an advantage

Experience

Experience of applying your engineering skills in industrial O&P, Chemical/Pharma environments such as operations, technical support, inspection, maintenance, consultancy, projects & process safety management

Involvement in management/support of large projects such as major turnarounds and/or construction projects

Previous experience of working for a major insurance carrier or broker would be an advantage as would experience of assessing construction projects

*Relocation will not be provided
