Company: join.com

Location: United Arab Emirates

Category: healthcare-practitioners-and-technical

Omniscript Software Solutions is looking for a Backend Engineer - .NET

Omniscript is on the mission to build a highly scalable, extensible and distributed e-commerce solution, which enables its enterprise clients to sell tickets to millions of customers.

We're looking for a middle Backend Engineer - .NET to join our remote team and shape the future of the product!

You will work remotely and play a key role in developing the engine with your diverse experience in software development!

### Tasks

Developing loosely coupled, complex, event-driven systems to process large amounts of data in a cloud environment.

Writing highly cohesive, clean and maintainable code.

Working cross-functionally with product managers, various software engineers, automation managers and non-technical people to bring the ideas to life.

Learning new design patterns and technologies to support the engine.

Writing unit and integration tests.

## **Requirements**

At least 3 years of experience with REST API, C#, .NET, .NET Core, Docker.

The professional experience building complex, distributed backend systems, including concepts such as microservices, event-driven architectures and cloud computing.

Experience using and modeling SQL and NoSQL databases.

Track record writing tests and implementing CI/CDs.

Good verbal and written English communication skills.

Strong problem solving skills and creativity.

## **Benefits**

Competitive salary

A long-term project with stable business clients

Opportunities for the fast career progression within the company

Flexible remote work and a team that is driven by strong values and a clear shared vision

Working with the latest technologies and systems, which will challenge your skills and push your creative limits

Strong engineering leadership and culture where you'll grow professionally

No useless algorithm tests - the interview process is designed to test how you will perform in real life.
