Are you ready to make a real-world impact while achieving your career goals? This is your chance if you are eager to take on exciting technical challenges in a highly collaborative environment. We are looking for a trusted advisor who can perform large and complex implementations with excellent interpersonal skills and a “can do” approach to create the future with us.

Oracle is a cloud leader that is changing the way the world does business, and our Apps Consulting team is hiring a senior consultant ERP Finance Cloud. The Oracle Applications team is responsible for successfully implementing Oracle Solutions to our clients. Be ready to become one of the ERP Cloud solutions focus leaders with some of the brightest and most innovative minds in the industry!

You will lead complex functional/process analysis and facilitate workshops with senior customer resources and subject matter experts. You will capture and understand client's business requirements and facilitate process design aligned with the modern best practices and critical to quality customer processes.

You will also be required to lead the complex functional analysis and review of solutions, functional designs, technical designs, and configuration within the project. You are an overall contributor to delivering a fully functioning solution to the client.

You liaise with business analysts for the requirements, management for the estimations and high-level planning, functional architects, technical architects, designers, developers, product

team, and test teams for the solution implementation, during the entire phase of project implementation.

You may also be required to be involved in pre-sales activities in mapping the client requirements to the base product functionality to present a product fit including custom solutions needed (if any) with its draft estimates/ resource loading. This may require participating in discovery sessions at client sites and capturing an accurate understanding of customer's business needs and supporting presales in responding accordingly.

Lead teams of designers and developers throughout the implementation life cycles to produce analysis and designs for new and ongoing projects demonstrating in-depth knowledge of functional domains such as General Ledger, Accounts Payables, Accounts Receivables, Fixed Assets, Cash Management, Budgeting, Intercompany Accounting, Encumbrance Accounting, Subledger Accounting SLA, Tax Management, Cost Management, and others.

The candidate should have in-depth knowledge of the overall architecture of Oracle ERP and Oracle Cloud ERP.

Should have a good understanding of how ERP works in tandem with EPM, PPM, SCM, RMCS, Risk Cloud, and other modules.

Should have a clear understanding of how the standard Oracle /Oracle Fusion product can be integrated with other third-party applications meeting all business requirements, minimizing information loss, and optimizing technical complexity.

Should have good experience in extension design, development, testing, and deployment from a functional perspective.

Should have expertise in the application of Oracle's Implementation methodology. Should have solid hands-on experience in cutover and data migration. Should have clarity of data migration ensuring reconciliation between source data and migrated data and sub-ledger vs general ledger.

Expertise in supporting Testing, Defects Analysis, and fixing in sync with product development and support

Demonstrate extensive knowledge of the Oracle solution and keep abreast with the product roadmap.

Good understanding of Oracle technology

## What you will do

You will analyze business needs and provide recommendations on programming the product hierarchy to address the customer's specifications. Write custom reports, and exports and make modifications to the solution to meet customers' needs.

Recommend Oracle ERP implementation and operational best practices, while guiding clients through the adoption of your recommendations.

Analyze and document customer business processes and requirements.

Running workshop sessions analyzing client requirements and recommending future state processes and solution designs.

Participate in lead test planning, document test plans, and perform solution testing, document test results, and assist with defect resolution.

Identify and present Consulting Services opportunities.

- Identify the appropriate software architecture based on the requirements and design elements contained in a system specification

- Analyses software requirements, and defines solution parameters and specifications.

- Conduct formal workshops with the client to gather requirements, displaying knowledge of the business environment in defining the customer's needs

- Produce the estimations of the solution and be involved in the high-level planning and implementation methodology of the project.

- Able to engage in Pre-Sales activities and writing of technical proposals

- Leads the function design process. Facilitates design workshops.

- Negotiates and manages functional scope to reduce business and technical risks for both the client and Oracle Consulting

- Requires Software Development Lifecycle experience.

- Ramp up on Cloud methodology and approach

Able to apply professional mastery and industry-wide understanding of technology, tools, and methodologies to develop solutions in leading-edge or critical situations.

- Viewed by customers as a trusted adviser

Able to manage the customer and manage situations during the implementation process

with the customer

- Assist software developers with the creation of detailed software design specifications.
- Perform software version control and maintain a periodic compilation schedule.
- Should be able to review the technical solution designs, and configuration aligned with the functional solution.
- Should be able to conduct training for clients and within Oracle.
- Coordinate with the product team to provide inputs for the future enhancement of the product.

### **What we will offer you**

- A competitive salary with exciting benefits
- Learning and development opportunities to advance your career
- An Employee Assistance Program to support your mental health
- Employee resource groups that champion our diverse communities
- Core benefits such as life insurance, and access to retirement planning
- An inclusive culture that celebrates what makes you unique

At Oracle, we don't just respect differences—we celebrate them. We believe that innovation starts with inclusion and to create the future we need people with diverse backgrounds, perspectives, and abilities. That's why we're committed to creating a workplace where all kinds of people can do their best work. It's when everyone's voice is heard and valued that we're inspired to go beyond what's been done before.
