What you will do

As an Advisory Oracle FMW, you are expected to be an expert member of the problem-solving/avoidance team and be highly skilled in solving extremely complex (often previously unknown), critical customer issues. Performing the assigned duties with a high level of autonomy and reporting to management on customer status and technical matters on a regular basis, you will be expected to work with very limited guidance from management. Further, the Advisory Oracle FMW is sought by customers and Oracle employees to provide expert technical advice.

Leading contributor individually and as a team member, providing direction and mentoring to others. Work is non-routine and very complex, involving the application of advanced technical/business skills in area of specialization. Because of substantial customer interfacing, a demonstrated ability to work with customers on an independent basis with exceptional communication skills, while consistently achieving the absolute highest levels of customer satisfaction.

As part of Oracle's employment process candidates will be required to successfully complete a pre-employment screening process. This will involve identity and employment verification, professional references, education verification and professional qualifications and memberships (if applicable).

Oracle Fusion Middleware Solution Specialist will be responsible for providing technical leadership and assistance for Oracle designing, architecting, creating and managing the

various services within on primes or Oracle Cloud Infrastructure. This position will be focused on supporting the client engagements requiring Oracle Cloud Infrastructure and Oracle Fusion Middleware. Supported systems will span flavors of Windows, UNIX, and Linux along with Oracle cloud and other cloud service provider platforms. In addition to hands-on technical work this position will require providing assistance to project teams with architecture design, upgrades, performance tuning, systems stabilization, documentation development and the creation of client deliverables.

Minimum of a Bachelor's degree.10+ years' experience installing, configuring, administering, tuning, and troubleshooting Oracle Fusion Middleware products on Linux, UNIX and Windows environments.Extensive experience in Oracle WebLogic server and knowledge of Oracle Fusion Middleware products like SOA, OBIEE, OBIA, WebCenter, OIM, etc. with a strong DBA background.Troubleshooting issues related to FMW products and components like Node Manager, JNDI, JDBC Data sources, Web services, Adapters, etc.Experience in using Enterprise Manager Fusion Middleware Control and other administration utilities.Subject matter specialist in database administration, RAC, Performance tuning, and Backup and Recovery skills in Oracle 9i, 10g, 11g, 12c, 19c, and RAC on UNIX, Linux and Windows environments.Hands-on experience on working with Oracle Cloud Infrastructure (OCI) Platform.Exposure towards creating and configuring OCI Compute service offering features like Virtual Machines.Release management support for application implementation, installs, data migrations, and system software upgrades.Excellent English verbal and written communication skills are required.Proven skills as a team member on at least two or more full cycle implementations
