Oracle Principal Fusion Middleware Engineer - Identity management

Apply Now

Company: Oracle

Location: United Arab Emirates

Category: computer-and-mathematical

What you will do

As an Advisory Oracle FMW, you are expected to be an expert member of the problem-solving/avoidance team and be highly skilled in solving extremely complex (often previously unknown), critical customer issues. Performing the assigned duties with a high level of autonomy and reporting to management on customer status and technical matters on a regular basis, you will be expected to work with very limited guidance from management. Further, the Advisory Oracle FMW is sought by customers and Oracle employees to provide expert technical advice.

Leading contributor individually and as a team member, providing direction and mentoring to others. Work is non-routine and very complex, involving the application of advanced technical/business skills in area of specialization. Because of substantial customer interfacing, a demonstrated ability to work with customers on an independent basis with exceptional communication skills, while consistently achieving the absolute highest levels of customer satisfaction.

As part of Oracle's employment process candidates will be required to successfully complete a pre-employment screening process. This will involve identity and employment verification, professional references, education verification and professional qualifications and memberships (if applicable).

Oracle Fusion Middleware Solution Specialist will be responsible for providing technical leadership and assistance for Oracle designing, architecting, creating and managing the

various services within on primes or Oracle Cloud Infrastructure. This position will be focused on supporting the client engagements requiring Oracle Cloud Infrastructure and Oracle Fusion Middleware. Supported systems will span flavors of Windows, UNIX, and Linux along with Oracle cloud and other cloud service provider platforms. In addition to hands-on technical work this position will require providing assistance to project teams with architecture design, upgrades, performance tuning, systems stabilization, documentation development and the creation of client deliverables.

Minimum of a Bachelor's degree.

10+ years' experience installing, configuring, administering, tuning, and troubleshooting Oracle Fusion Middleware products on Linux, UNIX and Windows environments.

Extensive experience in Oracle WebLogic server and knowledge of Oracle Fusion Middleware products like SOA, OBIEE, OBIA, WebCenter, OIM, etc. with a strong DBA background.

Troubleshooting issues related to FMW products and components like Node Manager, JNDI, JDBC Data sources, Web services, Adapters, etc.

Experience in using Enterprise Manager Fusion Middleware Control and other administration utilities.

Subject matter specialist in database administration, RAC, Performance tuning, and Backup and Recovery skills in Oracle 9i, 10g, 11g, 12c, 19c, and RAC on UNIX, Linux and Windows environments.

Hands-on experience on working with Oracle Cloud Infrastructure (OCI) Platform.

Exposure towards creating and configuring OCI Compute service offering features like Virtual Machines.

Release management support for application implementation, installs, data migrations, and system software upgrades.

Excellent English verbal and written communication skills are required.

Proven skills as a team member on at least two or more full cycle implementations

What we are looking for?

Preferred Experience and Responsibilities:

Exposure to migration/Lift and Shift of on-premise or other cloud service provider workloads of Oracle Middleware to OCI.

Experience with handling Oracle Workloads on other CSPs like AWS and Azure is a plus.

Experience with integration of Oracle Fusion Middleware products like SOA, OBIEE, OBIA, WebCenter, OIM, etc. with ERPs a plus (PeopleSoft, E-Business Suite, Hyperion .

Experience integrating Fusion Middleware products with Active Directory, configuration of SSL/TLS and SSO, and clustering.

Exposure to Oracle integration products like Oracle Golden Gate, Oracle Data Integrator and their corresponding Cloud service offering a plus.

Exposure to Oracle Analytics Cloud (OAC), SOA Cloud Services, and Oracle Integration Cloud.

Creative person who has developed innovative approaches to developing solutions.

Goal oriented with high standards for quality and performance

Prior consulting experience is desired.

Committed to gaining exposure to multiple packages/applications while further developing your career.

Ability to mentor and manage junior team members.

Ability to assist multiple projects environments simultaneously.

Exposure to Oracle Fusion Middleware Stack Oracle Weblogic, Apache, Oracle Business Intelligence OBI, Oracle Access Manager OAM, Oracle API Gateway OAG, Oracle Service Bus OSB, Oracle Internet Directory OID, Oracle Virtual Directory OVD

Ability to create, configure and manage OCI Storage service resources like Block Volumes, Object Storage Buckets and File Storage Service.

Experience in working with the Identity and Access Management features within OCI like creation of users, groups, policies, compartments, etc

Experience in working with Oracle DB systems on OCI.

Ideal candidates will also have experience with three or more of the following technologies:

Oracle Cloud Infrastructure services

Maintenance of Oracle Cloud Infrastructure tenancy

Configuration and administration of Compute, Storage and Network Resources

Ability to design and architect OCI tenancy to accommodate workloads across Regions and Availability Domains.

Working knowledge across Identity and Access Management and Governance features.

Experience on working with Database Service offerings available withing OCI.

Experience in migrating or lift and shift of applications and database to OCI

Oracle Weblogic Server

Install, Upgrade, Configuration and Tuning of Weblogic Server 11g and above.

Enterprise Integration, Web Services, J2EE and web applications experience

Setup and configuration of security and clusters

Deep understanding on JDBC, JNDI, partitioning and Node Manager

Deploy applications, including SOA Composite applications

Expertise in using Enterprise Manager Fusion Middleware Control and other administration utilities

Weblogic 12c and WLST scripting experience a plus

Troubleshooting of issues around Fusion Middleware Server and Operating System.

Oracle RDBMS - 9i/10g/11g/12c/19c database

Oracle Installation and database creation; DBA skills (physical design)

Oracle Programming Skills (SQL, PL/SQL)

Understanding of tools to manipulate data

Performance Tuning

Use of Oracle Enterprise Manager and other equivalent tools

Oracle Real Applications Clusters (RAC)

Backup, recovery and High Availability configuration

Unix, Linux , windows and Scripting

Knowledge of Unix (Solaris, AIX, HP) , Linux (Red Hat , OEL) and Windows Operating system

Shell and batch script Programming skills

Python and automation programming skills a plus

What we will offer you

A competitive salary with exciting benefits

At Oracle, we don't just respect differences—we celebrate them. We believe that innovation starts with inclusion and to create the future we need people with diverse backgrounds, perspectives, and abilities. That's why we're committed to creating a workplace where all kinds of people can do their best work. It's when everyone's voice is heard and valued that we're inspired to go beyond what's been done before.
