Responsibilities

Manage the plant consistent with operating policies and procedures, nuclear maintenance requirements, the license, design basis, and other regulatory requirements, to ensure regulatory compliance.

Ensure industry events related to operations and maintenance are reviewed and lessons learned are incorporated into maintenance documents to maintain optimal efficiency in delivering energy.

Recommend plant strategies, plans, and management process improvements to support achieving plant performance targets, and long-term plant reliability.

Provide guidance to plant management team to establish standards for housekeeping, material condition, as well as operations and maintenance effectiveness to ensure organizational effectiveness.
