Company: Trust Wallet

Location: United Arab Emirates

Category: healthcare-practitioners-and-technical

Company Description

Trust Wallet is the world's most inclusive, chain-agnostic, self-custody wallet that serves tens of millions users globally. Trust Wallet provides a secure, seamless and intuitive gateway to the crypto and NFT ecosystems. Our users are able to send, receive, stake, mint and store across 4.5+ million cryptocurrencies on 66+ blockchains, including Ethereum, BSC, Polygon, Solana, Avalanche, etc. Our developer community of different projects relies on us to reach millions of their users, build their own wallets, and grow crypto adoption.

Job Description

If you're passionate and motivated by building modern, cloud native and cloud agnostic platforms we invite you to join us to build innovative crypto architectures and advance technologies that will accelerate the delivery of web3 innovations to our users.

Responsibilities:

Infrastructure: You will be spearheading the planning and execution of infrastructure deployments, leveraging automation tools and best practices to guarantee a stable and scalable foundation for the platform serving our million users.

Operations: You will be managing day-to-day operations, troubleshooting issues, and optimizing workflows to maintain high availability (HA) and meet service level objectives (SLOs) for the platform.

Feature development: You will be owning backend features that support all our platforms (extension, mobile and desktop).

Interfacing with users: You will be interfacing directly with end-users and developers building on Trust Wallet – supporting them and collecting feedback to inform the direction of the product.

Team building: You will be working with the team to create and foster a culture of raising the bar with each new hire.

Qualifications

Deep experience managing and building with Cloud Platforms (AWS, Cloudflare)

Experience with Kubernetes and adjacent technologies (Istio, Helm Charts)

Experience with infrastructure configuration management (Terraform, Atlantis)

Experience building CI/CD pipelines and accelerating application delivery (GitHub Actions, ArgoCD)

Experience with production observability technologies (Prometheus, Grafana, Sentry)

Hands on Go lang experience (Networking, HTTP, gRPC, OpenTelemetry)

Expertise in implementing SRE principles, focusing on maintaining high availability

Familiar with incident handling and on-call responsibilities

Additional Information

Why work at Trust Wallet

Be a part of the world's leading blockchain ecosystem that continues to grow and offers excellent career development opportunities.

Work alongside diverse, world-class talent, in an environment where learning and growth opportunities are endless.
