## Power/Energy - Head of Operation and Maintenance

[Apply Now](#)

Company: Black Pearl

Location: United Arab Emirates

Category: healthcare-practitioners-and-technical

Currently, we are servicing an energy company in the UAE. They are a leading organization dedicated to providing reliable and efficient power transmission and distribution services to our community. They are looking for a Head of Operations and Maintenance for their power distribution assets in various locations. This is a strategic role that will allow someone to develop and further enhance their growing portfolio. The successful candidate will be responsible for overseeing all aspects of power transmission and distribution operations and maintenance activities within our organization. This role requires a strong leader with exceptional technical knowledge, strategic planning abilities, and a focus on driving operational efficiency and excellence. Other responsibilities will include:

Develop and implement strategic plans and initiatives to optimize power transmission and distribution operations in alignment with organizational goals and objectives.

Lead, motivate, and mentor a team of operations and maintenance professionals to ensure high performance, productivity, and adherence to safety standards.

Manage the operation and maintenance of power transmission and distribution networks, including substations, transformers, and switchgear, to maintain system reliability and integrity.

Develop and implement comprehensive asset management strategies to optimize the performance and lifespan of power transmission and distribution assets.

Ensure compliance with regulatory requirements, industry standards, and safety protocols to maintain a safe working environment and mitigate operational risks.

Develop and manage power budgets, forecasts, and expenditures to ensure optimal resource allocation and cost control.

Establish and maintain effective relationships with vendors, contractors, and stakeholders to support operational objectives and project delivery.

Implement key performance indicators (KPIs) and performance metrics to monitor and evaluate operational performance, identify areas for improvement, and drive operational excellence.

Develop and implement emergency response plans and procedures to effectively manage and mitigate risks during power system disruptions or emergencies.

Stay abreast of emerging technologies and industry trends to identify opportunities for innovation and technology integration in power operations and maintenance practices.
