

Principal Backend Engineer

Apply Now

Company: Alpheya

Location: Abu Dhabi

Category: healthcare-practitioners-and-technical

About Alpheya

We are a B2B WealthTech startup based in Abu Dhabi and backed by BNY Mellon and Lunate.

Our mission is to power and grow our clients' Wealth franchises through differentiated experiences, financial solutions, and insights. We are doing this through a state-of-the-art digital wealth management platform, that will enable banks and other financial institutions in the GCC to grow and further penetrate affluent, HNW and UHNW investor segments.

While still leveraging the capabilities and knowledge of large organizations, our fintech is a startup with truly cross-functional and agile teams.

This is an opportunity to be part of an exciting opportunity right from its inception, as we look to build our organization, design, and build the product and go-live with the first client in the next 12 months.

Principal Backend Engineer

Main responsibilities

Leading the backend development of our Node.js-based fintech platform.

Collaborating with Frontend Developers, Product Managers, and Designers to build robust backend solutions.

Owning the end-to-end development and maintenance of backend services, ensuring

scalability, security, and reliability.

Providing technical leadership in server-side development and database management.

Innovating and improving development practices and backend architecture.

Fostering a culture of continuous learning and backend excellence.

This role uniquely blends technical leadership with hands-on backend development. You'll play a crucial role in building and scaling a state-of-the-art fintech platform, addressing unique challenges in backend services and data management. Your contributions are vital to the platform's performance and our company's growth.

Projects Leading the backend development for new functionalities, optimizing performance and scalability, implementing secure and efficient APIs, and driving the integration of cloud-based services.

Requirements

Expertise in Node.js, TypeScript, and building GraphQL and RESTful APIs.

Strong understanding of Node.js, ORMs, and backend development principles.

Excellent communication, teamwork, and problem-solving skills.

Proven experience in leading complex backend projects in large teams.

Familiarity with cloud services (e.g., AWS, Azure), CI/CD pipelines and backend testing methodologies.

Knowledge of microservices architecture and containerization (e.g., Docker, Kubernetes).

Nice to have:

Experience in the Fintech or Banking sector.
