### Product Manager Jobs In Abu Dhabi | Anghami

About the job We're a homemade startup with international swagger and over 70 million registered users.

We're the first Arab tech company to list on NASDAQ stock exchange.

We're the largest music and audio streaming platform in MENA.

We pride ourselves with our Users and our Product.

We work hard every day to understand the needs and aspiration of our users.

We believe that music is ambivalent: It is as social as it is personal.

And so we aim at providing users with all the tools and features that grant them the full freedom to explore, share and connect through music.

Requirement We are looking for a product manager with an excellent product sense, an interest in UX, and a good understanding of how platforms like Anghami are built.

Anghami's product team is responsible for managing the conceptualization, design, development, and release of new features and products within our platform, ensuring that we deliver the best possible experience to our customers — while driving toward larger business goals.

You should be able to anticipate, recognize, and push through resistance or setbacks, and to work with others to find common ground amongst conflicts.

A product manager will go out of their way to solve a problem.

Have an ability to be creative & inspire team members to be action-oriented and stretch their imagination. #J-18808-Ljbffr
