### Program Officer, Instructional Design Jobs In Jebel Ali 2022 | Transcend

#### Description:

We are now looking for a competent Instructional Designer to join our team. The Instructional Designer will use theory and research to design, create, and implement accessible learning materials, collaborating with faculty to organize content, activities, and assessments in accordance with research-identified best practices.

**Job Requirements:**Evaluates the success of educational programs by developing assessment components that monitor results and guarantee alignment with corporate goals.

Incorporate existing project and management practices, instructional design standards and procedures, and corporate brand style and standards, including compliance needs.

Multitask in a fast-paced, uncertain setting while providing high-quality work on schedule while managing several projects.

In conjunction with partners, identify and assess global and regional learning needs; establish instructional goals; and produce engaging course content to meet educational objectives.

you'll stay abreast of industry and technological advancements and suggest new tools and methods for improving instructional content and departmental operations.

Co-ordinates needs/audience analysis to create performance goals, learning strategies, and instructional approaches in line with the organization's corporate objectives and strategic imperatives together with instructional designers.

The creation of educational materials such as e-learning courses, tests, presentations, manuals for instructors, video and audio recordings and simulations or role-playing games

may assist students in retaining knowledge and learning it more effectively.

Instruct professors and staff in the technical and pedagogical skills essential for creating and delivering interesting, interactive online courses.

Adult learning theory should be used to develop courses, instructional materials, and other electronic instructional content for delivery via e-learning.

Research and development with the objective of making difficult knowledge accessible to a wide range of learners using online or multi-media learning resources.#J-18808-Ljbfrr
