### Job Description

#### Project Manager – Physical Oil Trading Software Implementation

#### Location: Dubai

Business Analyst, Project Manager, Commodities, Oil, Java, SQL, ETRM, CTRM, Technology

Our client, market leading supplier of Energy Trading and Risk Management Systems, is currently looking for a new Project Manager to join their team in a client facing role.

This client is best known for their leading software solution in the ETRM space. They are experts in the commodity trading industry and the chosen candidate will have great exposure within this space and the privilege to work with their top list of clients.

The role will involve working with numerous areas of the financial markets from OTC Trading, Physical Logistics, Credit Risk, Derivatives, Futures, Options, Counter party risk, Regulatory Compliance, Weather volatility.

This will give the right candidate the opportunity to develop their technical skills and gain valuable industry knowledge.

#### **As a Project Manager your expected skills, experience and responsibilities:**

Strong knowledge of physical oil trading

Project Management (lead a team in a fast pace environment)

Able to write functional specifications

Hands on Implementation, Business and technical troubleshooting skills

Bulk commodity trading knowledge

Knowledge of futures oil

Technical knowledge – scripting in Java or other languages.

This is a fantastic role and great opportunity to join a leading company, this role would best suit someone who is passionate about commodity and technology so if you feel like this role could work for you, please get in contact!
