Description:

We are seeking a highly skilled Quality Assurance (QA) Engineer to join our dynamic team. The ideal candidate should have 3-4 years of experience in manual and automated testing for web and mobile applications, as well as a keen eye for detail, a passion for quality assurance, and a solid understanding of the latest software and testing trends.

Responsibilities:

Collaborate with cross-functional teams to ensure that all features are tested and released with high quality.

Develop, maintain, and execute manual and automated test scripts.

Create and maintain test plans and test cases that ensure comprehensive test coverage.

Conduct functional, regression, and integration testing to identify, track, and report defects.

Work closely with developers to ensure that defects are resolved and to make any necessary adjustments during development.

Stay up-to-date with the latest testing trends, tools, and technologies and apply them to the testing process.

Requirements:

Bachelor's degree in Computer Science, Engineering, or a related field.

3-4 years of experience in manual and automated testing for web and mobile applications.

Strong proficiency in using testing tools such as Selenium, Appium, Postman, JMeter, and other relevant tools.

Excellent communication and collaboration skills with a proactive approach to problem-solving.

Familiarity with Agile development methodologies.

Knowledge of software testing life cycle, test planning, and test execution.

Experience with performance testing and security testing is a plus.
