Responsibilities Develop and implement a comprehensive quality management system (QMS) for the railway project, aligning it with local regulations and international standards.

Establish and maintain quality control procedures, including inspection plans, test protocols, and documentation requirements.

Conduct regular inspections of construction sites, materials, and equipment to verify compliance with quality and safety standards.

Collaborate with project stakeholders to identify and address any quality-related issues, ensuring timely resolution and minimal impact on project timelines.

Manage and supervise a team of QA/QC inspectors, providing guidance, training, and support.

Monitor the effectiveness of the QMS through regular audits, evaluating performance against established benchmarks and implementing improvements as necessary. [Apply Also Asst](#)
