

Qoipr Product Testing

[Apply Now](#)

Company: Nityo Infotech

Location: United Arab Emirates

Category: healthcare-practitioners-and-technical

Ideal CandidateThe Test Analyst works in a global test team responsible for the delivery of tested systems into production, interpreting business and technical requirements and executing functional testing activities across the organization. The Testing Services practitioner role also includes experience in building and executing comprehensive suites of automation test plans and test cases, reporting defects and follow up, maintaining the automation framework, continued evaluation of test cases for inclusion in regression, automation for newly integrated features, and development of toolsets to augment QA and Development Testing. The Test Analyst works closely with Software Developers and other engineers in scrum teams to deliver the highest quality products in a timely and cost-effective manner. The person is also responsible for maintaining effective and consistent communication within the team, with peers, the leadership team (onshore/offshore) and the peers in other IT groups. Responsible for code release and production support. Certified Software Test Automation Specialist (CSTAS / ISTQB) or any other professional certificate that supplements formal education. Location Remote Chennai, Remote Philippines, Working during Australian Hours preferable. Any startup hands on-product verification and validation expert will be an added advantage for quick hiring closure.

Analytical/Decision Making Responsibilities:

- Startup attitude: Hire, train fresh grads, create a team in 6 months.
- Customer communication, Constraint less for first 6 months to create and manage a verification and validation team.
- Manage Jira, user stories, be part of product management team.
- Take control of Integrated test environment and user acceptance testing.
- Training the end users, defect finding based on end user tickets and converting them to technical work breakdown

structures. e-Volve Confidential • Work with Development, Test and Product Management to design and implement test and validation strategies. • Analyse customer feedback and create user stories on product new behaviours for growth or create and drive product bugs and their closures with dev team. • Must be from product management background than typ
