Responsibilities

Monitor the use of equipment to ensure it is safe and well-maintained and report any that doesn't meet the requirements.

Inspect procedures of the entire production cycle to ensure they are efficient and comply with food quality & safety standards.

Maintain records of testing, information and various metrics such as number of defective products per day, inspection results, etc.

Select output samples and check them using appropriate methods (measuring dimensions, testing functionality, comparing to specifications etc.)

Approve in-process production by confirming required specifications, conducting visual and measurement tests, and communicating the required adjustments to the concerned managers.
