Description: The RPA Developer will work independently on software development and problem resolution. The role involves technical design, software development, implementation and maintenance of RPA solutions/products that support the Emirates Group.

Job Responsibilities: Work with Principal Developer in the technical design process to analyse technical application requirements and project feasibility.

Convert technical solutions for small to medium initiatives into low level design and working code specific to RPA technologies.

Be part of the rotational on-call support and actively participate in resolving production issues within SLA's with minimal or no active supervision.

Accountable for built in quality and unit testing as part of the CI/CD pipeline. Job

Requirements: 3+ Years' experience in Information Technology

Degree or Honours (12+3 or equivalent): Degree in a relevant field such as Computer Science, Computational Mathematics, Computer Engineering or Software Engineering.

Certification in automation anywhere or UI Path or similar RPA platform as a BOT Developer.

Experience in Software Engineering experience preferably in agile ways of working. #J-
