Company Principles and Culture Our clients come first. We always prioritize their interests over ours. We only win when our clients win. If our clients lose, we lose too. Our AI provides our clients with an advantage over traditional investment methods. We aim to double our clients' earnings while minimizing risks. During times of market volatility, our clients should act 10 times faster than the rest of the market. Always act in the company's interests, not your personal interests. If you consistently act in the company's interests, you may manage the budget and make decisions on contracts and payments up to 30 times your earnings from the previous month. This keeps the company healthy and benefits everyone. Culture is important. Avoid working with unpleasant people - they won't take responsibility for their words and actions. Always make sure the unit economics are positive. Take into account all costs and unit economics (business, your time for the company, offers for clients). Take action to prevent downtime. Always consider the real cost of inaction from you and your colleagues in the company. We treat everyone equally, regardless of age, religion, orientation, nationality, or political views. Every employee must be a shareholder. Share distribution is based on excellent work, and employees can also buy shares at a special price. More information about shares will be provided below
