Using their expertise, problem-solving ability, and creative flair, the consultant will design, build, deliver, and maintain our Salesforce ecosystem. The consultant will also help develop business requirements, specifications, process flows, application design, and configuration, along with testing and deployment.

Responsibilities:

Design, build, and deliver tailored solutions for the business using Salesforce and other connected technologies

Provide day-to-day administration, troubleshooting, and maintenance for the connected Salesforce platform

Support continued build-out of key reports and dashboards, data administration, and integrity upkeep

Recommend new features and improvements to optimize and increase use of the platform

Provide technical specifications and help maintain overall documentation for the business

Adhere to and promote best practices, and design the guidelines for security procedures

Requirements:

Three or more years of experience with technical implementations

Advanced experience with Salesforce configurations

Background in CRM process design and implementation

Experience with enterprise integration tools and ETL (extract, transform, load) tools

Strong presentation and communication skills
