SAP started in 1972 as a team of five colleagues with a desire to do something new. Together, they changed enterprise software and reinvented how business was done. Today, as a market leader in enterprise application software, we remain true to our roots. That's why we engineer solutions to fuel innovation, foster equality and spread opportunity for our employees and customers across borders and cultures.

THE SAP YOUNG PROFESSIONALS PROGRAM

The SAP Young Professionals Program is a free initiative delivered by the Digital Skills Center of SAP. The program, which lasts for 2 months, is designed to give recent graduates the certifications and soft skills required to begin a career as an SAP Associate Consultant. At the end of the training, SAP will work very closely with the program graduates to introduce them to a host of opportunities with SAP customers and partners to work as an SAP Consultant.

SAP CONSULTANTS

The role of an SAP Consultant can be divided into 2 functions: Functional and Technical.

The consultant will contribute to blueprinting, design, implementation, operation, optimization, and upgrade phase of a S/4 HANA project, and provide business process as well as functional expertise, and project guidance to our clients to ensure their investment in SAP software and consulting services will make their business the best run business.

The Consultant is also responsible for maintaining a high degree of customer satisfaction in each of their accounts in addition to growing and developing referenceable customers through

their investigation, analysis, consulting, coaching, knowledge transfer, and relationship-building efforts.

CERTIFICATE INFORMATION:

SAP S/4HANA Cloud is a complete enterprise resource planning (ERP) system with built-in intelligent technologies, including AI, machine learning, and advanced analytics. It helps companies adopt new business models, manage business change at speed, orchestrate internal and external resources, and use the predictive power of AI. Benefit from tight, native integration between processes, industry depth, and a consistent in-memory data model.
