Company: Sigma Earth

Location: dubai

Category: other-general

Overview

At Jacobs, we strive to push the boundaries of innovation to create a smarter and more interconnected world. As part of our ongoing commitment to numerous strategic and prestigious clients across the Middle East, we offer comprehensive technical and managerial support for major aviation development initiatives and strategic studies. Our team consists of industry-leading innovators dedicated to working closely with our clients to develop new strategies and devise innovative solutions on a daily basis.

Are you interested in contributing to our aviation growth journey and making a meaningful impact on our clients?

Responsibilities

Our aviation team in the Middle East is undergoing exciting expansion, and we are seeking a dynamic Aviation Planner to provide regional support in the pursuit and management of airport and landside-related design projects. Your responsibilities will include: Reviewing the Airport Master Plan Update and collaborating with the Client Master Planner to ensure alignment with short-term and long-term aviation requirements.

Participating in the review of project definition documents for Terminal Area, Airside, and Landside packages, and undertaking planning tasks such as airfield capacity and geometric layout planning, obstacle limitation surface assessment, terminal and cargo facilities capacity planning, as well as landside and support facilities layout planning.

Maintaining compliance with Master Plan requirements and reviewing design submittals as part of the design review process.

Assessing proposed design and Master Plan changes to evaluate their impacts.

Contributing to business strategy development and marketing plans.

Reviewing work produced by team members to ensure adherence to policies, procedures, regulations, and quality standards. Requirements

As a successful candidate, you will hold a degree in Civil Engineering or Architecture, or equivalent qualifications, with registration as a Professional/Chartered Engineer preferred.

Additionally, you should have: A minimum of 10 years of experience in aviation planning projects.

Demonstrated experience with large aviation projects.

Proficiency in addressing terminal and airfield planning issues.

Knowledge of airside and landside design, planning aspects, and terminal facilities (preferred).

Experience leading and working in multidisciplinary teams. #J-18808-Ljbffr
