Senior Business Intelligence Consultant - Global Travel Are you ready to embark on a thrilling adventure as a Senior Business Intelligence Consultant? Join our dynamic team based in Dubai, where you'll have the opportunity to travel the world, partnering with top-tier clients to unlock their data-driven potential. The Day to Day As a Senior Business Intelligence Consultant, you will be at the forefront of transforming businesses through advanced analytics, data management, and strategic insights. Your expertise in business intelligence and passion for delivering impactful solutions will make you an invaluable asset to our global clientele. Responsibilities: Collaborate closely with clients to understand their business objectives and challenges, and translate them into data-driven solutions. Conduct in-depth data analysis, employing advanced techniques and tools to extract valuable insights and identify growth opportunities. Design and develop robust business intelligence solutions, including data models, dashboards, and reports, to provide actionable insights to stakeholders. Lead end-to-end project implementations, including requirements gathering, solution design, development, testing, and deployment. Provide strategic guidance and consulting services to clients, advising on best practices, industry trends, and data-driven decision-making strategies. Conduct workshops, trainings, and knowledge-sharing sessions to empower clients in utilizing business intelligence tools and technologies effectively. Requirements: Bachelor's or Master's degree in Computer Science, Data Science, Business Analytics, or a related field. Minimum of 7 years of experience in business intelligence, data analytics, and consulting roles. Strong expertise in Data Vault modeling technique, including the ability to design and implement Data Vault structures for scalable and flexible data integration. Proficient in data

visualization tools such as Tableau, Power BI, or QlikView. Solid understanding of SQL, ETL processes, and data warehousing concepts. Experience in building and optimizing Data Vault-based data warehouses, including the development of Data Vault models, satellite tables, and hub-link-schema relationships. Familiarity with automation tools and frameworks for Data Vault modeling and development. Strong knowledge of advanced analytics techniques, including predictive modeling, statistical analysis, and machine learning. Proven track record of successfully delivering end-to-end business intelligence projects using Data Vault methodology and driving positive business outcomes. Excellent communication and presentation skills, with the ability to effectively engage with clients at all levels of the organization. Flexibility and willingness to travel extensively to client locations worldwide. We value your expertise in Data Vault modeling technique as it plays a crucial role in our data integration and warehousing strategies. Join our team of talented consultants, and together, we'll revolutionize the way businesses harness the power of data. Note: Please submit your resume, along with a cover letter detailing your relevant experience and your availability for international travel. Only shortlisted candidates will be contacted for further assessment.
