Senior Cyber Security Instructor Jobs in Dubai | Mandiant Careers

Description:

As a member of the Education team, you will be responsible for aspects of both internal and external education, specifically in cyber security areas such as digital forensics and incident

response. As a technical functional role, it includes training delivery, course development, and documentation support.

Responsibilities:

Deliver classroom training to a variety of technical audiences

Provide support for cyber security course development efforts, including product research, providing subject matter expertise, and training content review

Create, update, and maintain slide decks and lab exercises for customer-facing training

Requirements:

5+ years experience as a technical trainer / sales engineer / professional services consultant or equivalent technical position

2 + years experience with delivering ILT and VILT courses in cyber security-related topics (e.g., digital forensics, intrusion detection, incident response) to highly technical audiences

Ability to quickly grasp highly technical concepts and clearly communicate these technical concepts in live presentations
