Company: 1Recruit International

Location: Dubai

Category: other-general

Our client, one of the fastest growing public safety and security solutions organisations globally, is looking to recruit a qualified and experienced Senior Developer, to their UAE, research and development team. Our employer seeks a proven performer to assist on their main projects in the region, which include the implementation of advanced integrated security solutions for critical assets, safe city and border protection. As a Senior Developer you will be responsible for architecture, design, implementation and delivery of our software products. As key player in a scrum team, you will work on tasks assigned to the team and support others in successfully completing their respective assignments. Based on lean and agile methodology, work in the team will cover all aspects of the software development life-cycle, from agile planning, architecture and specification via design, implementation, validation and testing to deployment, installation and support. Driven by a strong customer focus, our senior development team members consistently push themselves and the team to maximize customer value in our products. You will monitor and constantly enhance the team's standards for best-in-class quality, efficiency and transparency. As part of an agile team, you will dedicate time and energy to continuous improvement of team processes, knowledge transfer and technical coaching, while striving to enhance your personal as well as professional skills. The responsibilities of the role include:

- Design and develop client / server applications in the domain of command and control (e.g. coordinate emergency response teams), smart urban management (traffic, water or energy management) or functionality in the area of video- and data analytics
- Design and develop mobile applications for Android, iOS, BB or Windows mobile for smart phones and tablets that provide situational awareness, personal safety,

communication or sensor functionality•Apply and constantly enhance application of the scrum process framework in international, agile cross-functional teams•Collaborate with internal and external stakeholders to ensure successful implementation of the team backlog•Drive end-to-end integration and testing of your deliverables, contribute to test automation and support continuous integration and delivery•Drive (lean) architecture and continuous refactoring on a daily basis in order to evolve the most suitable architecture for our applicationsThe experience we seek includes:•Masters in Computer Science or Electrical Engineering / Network Communication or comparable•3-6 years of experience in industrial software development environments in one of these areas: Telecom, Infrastructure, Systems Integration, Databases, Operating Systems, or Applications•Sound professional programming expertise in distributed systems based on Microsoft technologies (.NET, WPF, ASP.NET, MS SQL, NHibernate, Active Directory, Windows Server, TFS)•2 or more years of professional experience in applying C#, C++ as well as one or more of the following programming languages: Java, JavaScript, Objective C, VB, VB.Net;•Good working knowledge in two or more of the following domains/technologies is a plus: HTML5, CUDA, Android, iOS, SQL, LINQ, Ajax, SOAP, REST, \*sh, TFS, Ant, Maven, JUnit, CI Frameworks, PRISM, MEF, xUnit, SpecFlow•Knowledge and interest in low lev
