Description:

The senior software developers are responsible for designing, testing, and implementing new and updated software programs. They take on a managerial role and lead the development team with all software development tasks. Their job is to ensure all projects are completed on time and to company specifications.

Job Responsibilities

Analyse the impact of business requirements, highlighting any potential risks or issues, and providing recommendations where required.

Prioritize the requirements with the support of the project manager and the business and complete the development of projects according to their agreed priority.

Support, maintain and enhance applications to enable effective operations (bug fixes, application support, etc.)

Review and deliver end-user documentation (user guides, process flow charts, training material) and deliver training where required.

Monitor the quality of solutions delivered and ensure they meet agreed standards in terms of performance and reliability.

Job Requirements

Experience in Sitecore 9 Certification development and working experience on Sitecore 9 Azure PaaS ReactJS Solid programming

Experience with version control systems GIT

Experience creating and consuming web services including REST JSON

Familiarity with integration to ERP CRM DAM and other backend systems

Familiarity with and ability to utilize Sitecore DLLs within an MVC project to manage data within the Sitecore CMS and multiple back end systems
