

Senior Engineer HVAC (With Marine & offshore HVAC code Knowledge)

[Apply Now](#)

Company: Stallion

Location: dubai

Category: other-general

Day- to-day operations

Carry out duties assigned by superior for day-to-day operations and to ensure them to compliance with the established standards and procedures

Prepare Concept design input, preliminary or detail design for HVAC system.

Undertaking design verification and calculations, as required.

Coordination with design and drafting personnel for checking and issuing of drawings and design documents.

Provide estimation support.

Review of vendor technical offers, compliance statements.

Attending model reviews with client.

Preparation of documentation for approval of Class and statutory bodies.

Internal review, comment and approval of design deliverables such as Heat load calculation, Equipment sizing calculation, Room positive pressure calculation, D&IDs, Airflow Diagram, Ducting layouts, P&IDs, Chilled water flow diagram, Piping layouts, Ducting and Pipe sizing calculation, ESP and head calculation, HVAC foundation and Penetration layouts, Yard typical installation practice for HVAC installation, HVAC Equipment's vendor data sheet, etc.

Pre-Commissioning & Commissioning of complete HVAC Sub-Systems designed for the projects.

Attending FAT in vendors manufacturing plant for visual mechanical inspection and performance test if any as needed by project requirement.

Attending HVAC System Site Acceptance Test (SAT) in yard.

Review client specifications and prepare clear scope matrix, raise TQ and clarifications

Technical competencies

Exposure to HVAC Design software, Drafting & Modelling tools.

Knowledge of Marine & offshore HVAC codes, Classification Society Rules and Statutory Regulations.

Good coordination and presentation skills.

Ability to develop, interpret and follow method statements and procedures, specifications, drawings, and all other discipline related project and engineering documentation

Thorough understanding of technical drawings, plans and data.

Possess knowledge of MS Office applications.

Knowledge and experience in Marine, Oil & Gas & HVDC Offshore Projects.

Education

Degree in Mechanical Engineering / Civil

Masters in Mechanical or HVAC related.

Training

Training in a Ship Yard / Offshore / Oil & Gas industry

Leadership training

Presentation skills

Design software HAPE20

Experience

Minimum 10 years of experience in relevant field.

Experience in Oil & Gas / Offshore industry

Job Types: Temporary, ContractContract length: 6 months

Salary: AED7,000.00 - AED8,000.00 per month

Application Question(s):

Can you join immediately?

Are you willing to work for 6 months contract extendable?

Do you have ability to develop, interpret and follow method statements and procedures, specifications, drawings, and all other discipline related project and engineering documentation?

Do you have exposure to HVAC Design software, Drafting & Modelling tools.

Do you have knowledge of Marine & offshore HVAC codes, Classification Society Rules and Statutory Regulations?

Do you hold Masters in Mechanical or HVAC related. or Degree in Mechanical Engineering / Civil?

Do you have knowledge and experience in Marine, Oil & Gas & HVDC Offshore Projects?

can you do Internal review, comment and approval of design deliverables such as Heat load calculation, Equipment sizing calculation, Room positive pressure calculation, D&IDs, Airflow Diagram, Ducting layouts, P&IDs?

Are you willing to work on AED8,000 salary per month (inclusive of all)

Experience:

In shipyard, offshore / Oil & Gas industry: 4 years (Preferred)
