Senior Frontend Developer (Quant Research) Asia / Europe / UAE, Dubai Engineering – Frontend / Full-time Onsite or Remote / Hybrid Apply for this job

Binance is the leading global blockchain ecosystem and cryptocurrency infrastructure provider whose suite of financial products includes the world's largest digital-asset exchange. Our mission is to accelerate cryptocurrency adoption and increase the freedom of money. If you're looking for a fast-paced, mission-driven organization where opportunities to learn and excel are endless, then Binance is the place for you. We are looking for a Senior Frontend Developer (React) to join our team. As part of the team, you will have the opportunity to contribute to greenfield projects with daily duties that include but aren't confined to the below.

Responsibilities: Engage in all stages of the software development life cycle: from establishing requirements, to designing, writing code, testing, and deployment. Possess strong technical skills, enabling the delivery of high-quality production code. Collaborate with the Quant research team to enhance the effectiveness of trading models. Liaise with trading and operations teams to develop new products and improve existing ones. Establish and improve trading system infrastructure to handle large scale positions and orders. Identify system bottlenecks and bugs, and implement solutions to address these issues. Mentor junior developers within the team and assist with design and code reviews. Be available during flexible working hours to address production emergencies.

Requirements: 5+ years of experience in managing the complete project life cycle for large scale frontend projects written in React. Excellent problem-solving capabilities. Strong understanding of software design, architecture, development, and integration. Solid knowledge of event processing models,

enterprise integration patterns, web services, and REST. Familiarity with frontend frameworks such as AG Grid, Next.js, icejs is advantageous. Knowledge of backend skills such as Java, MySQL is a plus. Experience with algorithmic trading systems, investment banks, hedge funds, trading firms, or brokerages is a plus. A degree in Computer Science, Engineering, or a Mathematics/Algorithm-related field is a bonus. Working at Binance

- Be a part of the world's leading blockchain ecosystem that continues to grow and offers excellent career development opportunities
- Work alongside diverse, world-class talent in an environment where learning and growth opportunities are endless
- Tackle fast-paced, challenging and unique projects
- Work in a truly global organization, with international teams and a flat organizational structure
- Competitive salary and benefits
- Flexible working hours, remote-first, and casual work attire

Learn more about how Binancians embody the organization's core values, creating a unified culture that enables collaboration, excellence, and growth. Apply today to be a part of the Web3 revolution! Binance is committed to being an equal opportunity employer. We believe that having a diverse workforce is fundamental to our success. By submitting a job application, you confirm that you have read and agree to our Candidate Privacy Notice. The average yearly salary for a Web3 Front End Developer is \$120k per year, with a minimum base salary of \$50k and a maximum of \$240k. Get up to speed quickly with Rust and Solana for Free.
