Company Description

We are a forward-thinking immersive metaverse experience creation company that believes in the power of the metaverse and spatial web to transform interactions. They specialize in creating immersive metaverse experiences that span across Web, AR and VR, leveraging cutting-edge technology to bring clients' visions to life. The team of experts here is dedicated to pushing the boundaries of what's possible in the world of web3, exploring new use-cases and applications that can connect the physical and digital worlds in powerful ways. They work closely with clients to understand their unique needs and goals, developing customized solutions that align with their visions and brands.

Role Description

This is a full-time hybrid Senior Game Developer (Unity, WebGL, UE) creating immersive virtual environments across web, AR & VR. The Senior Game Developer will be responsible for day-to-day tasks such as Game Programming, Gameplay Programming, Programming, Object-Oriented Programming (OOP), and Game Design, as well as collaborating with designers and artists to create high-quality, engaging, and memorable game experiences. The developer will also be responsible for debugging game development issues and optimizing game performance across different platforms and devices.

Qualifications

Strong skills in Game Programming, Gameplay Programming, and Object-Oriented Programming (OOP)

Experience in Game Design

Ability to optimize performance across different platforms and devices

Excellent teamwork and collaboration skills, ability to communicate effectively both verbally and in written form

5+ years of experience as a Senior Game Developer

Bachelor's or Master's degree in Computer Science, Game Development or a related field

Experience in Unity, WebGL, and UE frameworks is required

Knowledge of AR/VR technologies and experience creating AR/VR games is a plus

Compensation & Package

80 - 120K USD - possibly more for an exceptional candidate.
