Senior iOS Engineer Department: Tech Platform Employment Type: Full Time Location:

Remote Reporting To: Grigorii Berngart Description

About the role

We are looking for an iOS Engineer with experience in launching large applications, ready to act as a feature lead and accompany the full life cycle of the product from development to deployment.

Our ideal candidate is both technically strong and business oriented.

Core iOS Team is responsible for reliability, security, delivery, lovability, developer experience.

Our Mobile Platform

two applications and a mobile SDK;

Tabby's main client application in its continuous growth;

partner support application;

+50,000 DAU;

crash-free rate 99.98% (and we want to raise it even higher!);

4.8-4.9 App Store / Google Play rating;

Most of our users use Arabic, so Arabic-first is our priority.

Our tech stack and architecture

Swift 5.6+, Tuist, fastlane, Gitlab CI; UIKit, SwiftUI, Swift Concurrency for SDKs;

Structure: Modularized project;

Presentation layer: Unidirectional architecture like MVI, TCA or RxFeedback;

Logic layer: SOA.

To succeed in this role, we think you should have

Knowledge and practical experience in using Swift and the main iOS SDKs (UIKit, NSURLSession, Swift Concurrency, etc.);

Experience in application feature design and architecture selection (SOLID, DI);

Experience with security and privacy in iOS applications;

Experience in developing reusable UI components and custom animations;

Experience in building a fault-tolerant application in which the key decision code is driven by metrics;

Getting-things-done mindset;

English B1+.

As a plus

Experience in fintech and e-commerce;

Experience with Arabic language and RTL layout.

**Key Responsibilities**We expect our new iOS Engineer to own one of the zones of the responsibilities of the Core iOS Team.
