Role and responsibilities:

Most of the role will cover looking after contentious matters across international assets, with you being involved in high value arbitration.

Resolving such disputes will be an additional objective.

Work will also flow across from procurement, where you will develop, revise and apply standard templates across business sectors.

Candidate requirements:

You'll need to have strong private practice or in-house experience from a reputable organisation.

Either civil or common law experience is fine.

8+ PQE is ideal, with at least 4+ of that having concentrated on high value international arbitration.

Exposure specifically to oil and gas disputes is vital.
