

Senior Manager Quality Assurance - UAE National

[Apply Now](#)

Company: Michael Page

Location: United Arab Emirates

Category: other-general

The Role

Develop self-service solutions for the engineering department, delivering high-quality software efficiently through scaling strategies, automation scripts, and streamlined execution. Design, build, and optimise DevOps and QA automation systems for web, mobile, data, and infrastructure platforms. Client Details A prominent, leading semi-government organisation in the region driving interesting and exciting digital initiatives in the region. Description *

- * Set up and lead the QA practice, crafting impactful DevOps and Digital QA strategies, SOPs, tools, and building high-performing teams.
- * Research and test leading-edge techniques applicable to software development projects, ensuring you embrace industry best practices.
- * Create technology infrastructure and automation tools for configuration management maintenance.
- * Partner with architecture and technical leadership to build a comprehensive DevOps infrastructure.
- * Leverage your deep understanding of programming and digital architectures to design cost-efficient serverless solutions and manage CI/CD solutions across various products.
- * Establish and manage technologies like Terraform, Veracode, Azure DevOps, Selenium, JMeter, and other CI/CD tools.
- * Develop test strategies for DevOps and facilitate automated testing throughout the test lifecycle, emphasizing risk-based testing and test script reuse.
- * Implement, monitor, and evaluate QA methodologies and standards to ensure constant quality improvement.
- * Provide guidance to the test team for designing and implementing testing tasks, meeting project deliverables in day-to-day operations.
- * Create metrics and reports to capture test progress for projects and releases.
- * Track QA performance and report quality-related outcomes and activities to

the Senior Manager of Digital Governance and Quality Assurance team. * Implement deployment strategies to ensure zero service outages during updates and maintenance. Job Offer * Opportunity to work with influential stakeholders keen on driving digital innovation with exciting pace and impact.

Requirements

* Possess over 8 years' experience in Quality IT and Digital disruption, preferably across various industries. * Master the tools of the trade: Azure DevOps, Terraforms, Veracode, Selenium, JMeter, YAML, Python, and Jenkins. * Are an automation whiz with experience in configuring and automating monitoring tools.
