Wood is a global leader in consulting and engineering, helping to unlock solutions to critical challenges in energy and materials markets. We provide consulting, projects and operations solutions in 60 countries, employing around 35,000 people.

Responsibilities:

To manage the mechanical engineering and design of Static equipment

Ability to produce Mechanical Static equipment deliverables and ensure that they conform to all applicable engineering codes and standards as well as the Client's policies and procedures

To ensure that the overall project is delivered to meet the asset operational needs

To participate in all project safety and design reviews as necessary

To ensure that all work is completed without compromise to quality and is delivered according to the project schedule

To liaise with the Client's Engineering, Operations and Maintenance staff as required to ensure a consistent approach to project completion

To promote safe behaviour at all times

Requirements:

Minimum of 10 years experience in the oil and gas industry

Degree in Mechanical Engineering (B.Sc./B.Eng./M.Sc.)

Membership of a recognised professional institute preferred

Experience of working with multi-national and multi-cultural project teams is strongly preferred

Previous experience of working in the Middle East would be an advantage
