

Senior .NET Platform Software Engineer (copy)

[Apply Now](#)

Company: Xa Group

Location: united arab emirates

Category: other-general

XA Group is looking for a remote .NET Software Engineer to work on automotive software technology stack for enterprise-level clients and lead best-in-class engineering teams. This is an opportunity to work in multidisciplinary teams on global projects that defines the future of automotive technology. You must be a .NET Software Engineer with Azure Expertise. You must have 5+ years of experience with multiple Azure .NET technologies, take responsibility for the technical implementation of business objectives and establish partnerships within technical leadership at XA Group. Specifically, you will have ownership over AI, IoT, .NET and Analytics microservices and their SLA's. You will be participating in the entire software development life cycle, from requirements to SLA. If you're equally happy to roll up your sleeves to write code and review other team members' work, we'd like to meet you.

Responsibilities

- Analyze system requirements and create development plans
- Write clean, testable code using .NET programming languages
- Develop technical specifications and architecture
- Test and debug various .NET applications
- Review and refactor code
- Deploy fully functional applications
- Upgrade existing programs
- Support junior developers' work
- Document development and operational procedures
- Data governance & API governance

Requirements

- 5+ years of experience in .NET software development.
- Proficiency in building a suite of .NET microservices used in API/SDK first and headless fashion & event-based architecture using pub/sub and webbook technics.
- In-depth knowledge of at least one of the .NET languages (like C# and Visual Basic .NET).
- Familiarity with database technologies and design of systems using structure, semi structure and unstructured data.
- Knowledge about Cloud Technologies preferable Azure.
- Familiarity with agile

environments. Troubleshooting abilities. Good communication skills; English level: Upper-Intermediate+ (B2+) BSc in Computer Science, Engineering or relevant field. Nice to have Experience with Node.js, PHP
