

## Senior Pipeline Integrity Engineer

Apply Now

Company: Penspen

Location: Abu Dhabi

Category: architecture-and-engineering

### Senior Pipeline Integrity Engineer

Based in Abu Dhabi, Penspen is looking for a Senior Integrity Engineer with exceptional experience in Pipeline Integrity to be a part of Penspen's Asset Integrity division in Abu Dhabi.

Do you have demonstrable experience in:

Pipeline Integrity and Life Extension Assessment Studies

Application of ASME B31.G

10 years of proven Pipeline Integrity Management (FFS, Remaining Life Assessment & Life Extension Studies)

Performed 15+ Pipeline Integrity and Life Extension Assessments

If you are a real team player, currently client-facing, and answered yes to the above, please apply by sending your resume via the link

<https://careers.penspen.com/vacancy/senior-pipeline-integrity-engineer-5...>

Main Purpose of Role:

Technical: Carry out assigned asset integrity consultancy work with minimal supervision, including researching problems, engineering calculations, and preparation of reports.

Provide technical support to graduate engineers as required.

Project management: Manage small projects as directed and in accordance with company

procedures.

Business development: Support commercial and sales in meeting with clients, identifying technical scope of work, and supporting win jobs. Willingness to travel within the region and globally (expected 25% of time).

Responsibilities:

Executing pipelines integrity (FFS / RBI) assessments under the supervision of the Asset Integrity Manager and governance of the Chief Discipline Engineer (CDE)

Executing plant / pressurized static assets integrity (FFS / RBI) assessments under the supervision of the Project Manager and governance of the Chief Discipline Engineer (CDE)

Providing guidance to a team of young engineers on assets FFS and RBI

Producing high-quality deliverables as part of the project

Interact with Quality Assurance for quality issues; ensure compliance with Company's Quality procedures

Knowledge / Experience (Skills):

Knowledge of industry recognized software for FFS / RBI assessments is preferable, e.g Plus One, Fat free (freespan), PRBI and DnV Orbit software. Knowledge of FFS relevant codes and standards (such as API 579, ASME B31G etc.). High level of computer literacy with MS Office (specifically Word & Excel) and experience of other specific analysis software packages (e.g. MathCAD, Abaqus, Caesar, Autopipe etc.)

Qualifications:

Minimum 10 years of asset integrity engineering and management experience in the Oil and Gas industry. Bachelor's degree qualification in Mechanical engineering or similar. Master's degree is an advantage. NACE accreditation is an advantage. Professional membership with an engineering institute (ImechE, ASME etc)
