

Senior Primary Substation Design Engineer

[Apply Now](#)

Company: GHD

Location: Dubai

Category: architecture-and-engineering

What you will bring to the team: Bachelor's degree in electrical engineering. Minimum 10 years related experience working with Power Utilities, ideally working on Australian utility assets. Extensive experience in Primary Substation detailed design for substations from 132kV to 500kV Thorough understanding of switchyard layouts and busbar configurations, and selection / application. Experience in designing outdoor rigid and strung busbar including BoM preparation. Experience in designing layout of transformer bunds (to inform structural design). Experience in designing layout of switchyard conduits and trenches (to inform civil design). Experience in main equipment selection and preparation of technical specifications Understanding of primary design interfaces e.g. secondary, structural, civil, geotechnical, hydrology, etc. Understanding of operational and maintenance requirements. Construction experience would be advantageous. Strong ability in authoring design reports, scope of work and related technical documentation. Proficient at managing the quality of deliverables produced by others. Understanding of large-scale grid connection processes with local utilities. Ability to direct and coordinate works to meet schedule, budget and quality requirements. Have a strong focus on client relationships.
