Senior Software Engineer Jobs In Dubai | Canonical

About the job

Work across the full Linux stack from kernel through networking, virtualization and graphics to optimise Ubuntu, the world's most widely used Linux desktop and server, for the latest silicon.The role is a fast-paced, problem-solving role that's challenging yet very exciting. The right candidate must be resourceful, articulate, and able to deliver on a wide variety of solutions across Server, PC and IoT technologies. Our teams partner with specialist engineers from major silicon companies to integrate next-generation features and performance enhancements for upcoming hardware.

Requirement

You love technology and working with brilliant people

You have a Bachelor's degree in Computer Science, STEM or similar

You have experience with Linux packaging (Debian, RPM, Yocto)

You have experience working with open source communities and licences

You have experience working with C, C++

You can work in a globally distributed team through self-discipline and self-motivation.
