

Senior Solution Architect Salesforce Job in Dubai | Publicis Sapiant

[Apply Now](#)

Company: Publicis Sapiant

Location: Dubai

Category: other-general

Job Description:

Salesforce Senior Technical Architects are Salesforce platform experts who can take the puzzle-pieces that are a client's business requirements, and design masterpiece solutions. Creativity in problem solving as well as being an excellent listener are probably the most emphasised facets of a Salesforce Senior Technical Architect. Identifying how a client's architecture fits together and providing strategic and technical advice.

Job Responsibilities:

Understanding business and technical requirements and translating these into technical solutions

Analysing business processes and identifying alternative solutions, assessing feasibility and recommending new approaches typically seeking to exploit new technology components.

Modelling processes, architecture, data structures and information required to support Publicis Sapiant and their clients' projects

Leading the review and creation of an information systems strategy

Developing enterprise-grade architecture and processes which truly utilise and realise the value of salesforce.com application technology

Ensuring both business strategy and technological direction is aligned

Taking a collaborative role in developing and enforcing Publicis Sapiant set of architecture and development libraries and whitepapers

Setting standards for programming tools and techniques and advise on their application and

compliance

Supporting project managers in all stages of the software development process

Assigning work through the correct communication channels to technical consultants and monitor performance providing advice, guidance and assistance.

Job Requirements:

Extensive experience working as a Salesforce Technical Architect with large size customers including solving Enterprise Architectural challenges

Comfortable advising, mentoring, educating and influencing diverse teams on topics including Data Management, Integration, Security, Application Design as they relate to the Salesforce Platform

Demonstrable senior stakeholder management skills and experience

Proven aptitude to rapidly learn new technologies

Excellent interpersonal and communications skills

Solid presentation and facilitation skills

Proven leadership and consulting skills to build trust relationship with customers

Ability to lead a range of workshops e.g. Discovery, Solution Design and Delivery

Certified Application Architect and/or Certified System Architect

Hands-on delivery skills

Able to mentor talented individuals as part of a defined career framework

Eagerness to co-define and deliver advisory sessions for strategic initiatives

Help towards the development of the practice and build reusable frameworks

Ability to work independently and as part of a distributed team and a willingness to take ownership of problems

Bachelor's degree in a technical or business management field.

Design and development experience with alternative software platforms and programming languages.

Examples of where you have striven for product stability by balancing the optimal amounts of Salesforce configuration and custom code to solutions

Examples of re-using custom built frameworks in Salesforce to save time, cost or reduce risk (including creation of Accelerators).
