Responsibilities

Precast Concrete Design: Lead and oversee the structural design and analysis of precast concrete elements, including beams, columns, slabs, walls, and connections, ensuring compliance with relevant building codes and industry standards.

Project Management: Manage and coordinate all aspects of precast concrete projects, from conceptual design to construction documentation and site inspections, ensuring projects are completed on time and within budget.

Collaboration: Collaborate with architects, clients, and other engineering disciplines to develop integrated design solutions that meet project objectives and client expectations.

Quality Assurance: Implement quality control measures to ensure the accuracy and integrity of design calculations, drawings, and specifications related to precast concrete components.

Requirement

Bachelor's or Master's degree in Civil or Structural Engineering.

Professional Engineer (PE) license is an add on.

A minimum of 10 years of relevant experience in structural engineering, with a focus on precast concrete design.

Proficiency in structural analysis software such as ETABS, SAP2000, or similar.

Strong knowledge of relevant building codes and standards, including ACI, AISC, and PCI.

Excellent communication and interpersonal skills.

Proven project management abilities.

Ability to work collaboratively within a team and independently when required.

Strong problem-solving skills and attention to detail.
