LUXONOMY™ United Arab Emirates Remote Meet the hiring team Pablo Pablo Gutiérrez-Ravé Villalón 3rd Founder of the Metaverse LUXONOMY™ Land. Based in Dubai, LUXONOMY™ Land is FIRST HYPER-REALISTIC METAVERSE

Job poster Message LUXONOMY'll become one of the global leader in enterprise virtual (VR) and augmented reality (AR) software solutions, focusing on the life sciences, analytical, diagnostics and medical, pharmaceutical, chemical and processing industries. Our customers include several major, well-known companies. With our comprehensive scientific and industry expertise, we have developed a systematic approach to implementing VR and AR within the areas of sales and marketing, service and support, research and development, as well as manufacturing and production. We have cultivated a vibrant company culture with an international team of more than 80 people at our headquarters in Dubai (UAE) and at other locations in Madrid (Spain), Miami (USA), Bangalore (India), and Guangzhou (China). We place great value on fostering a creative, performance-driven and employee-centered work environment for everyone – whether your specialty is working with clients, developing cutting-edge technology or crunching numbers! In order to expand our team, we are now looking for a talented Senior Unreal Engine Developer

Your responsibilities:

Create VR/AR experiences for LUXONOMY in the Unreal Engine to create the overall flow and user experience

Identify opportunities to improve our general or technical workflows, and implement these changes

Ensure experience systems are performant

Collaborate with designers, artists, and production members to devise optimal engineering solutions for customer requirements

Mentor and coach Junior UE Developers

Support on project estimates and task breakdowns

Your profile:

5+ years of experience as a Game Dev Engineer, Unreal Developer, or comparative role

Strong problem-solving and analytic skills

Experienced with multiplayer gameplay systems, network replication and VR and/or AR technologies

Experience with advanced Blueprinting concepts

Experience with performance analysis and code optimization

Capable of breaking high-level tasks down into smaller tasks and build estimates

Highly motivated person with hands-on mentality and the desire to be part of an energetic and growing company

Good English communication and collaboration skills

What we offer you:

An opportunity to work for a market-leading, hypergrowth tech company with a broad international customer base that is using VR and AR to transform the way they work, learn and research

The experience of creating and implementing highly-valuable and innovative technology, while contributing to the long-term growth of a successful tech company

Profit from an open and modern work environment with flexible working hours

Bring in your own ideas and actively participate in shaping our company

Receive a competitive salary in accordance with your market area

Be a part of a diverse international team with highly-qualified and dedicated colleagues representing over 30 nationalities#J-18808-Ljbffr
