Signalling Maintenance Supervisor | Hitachi Rail Abu Dhabi

Hitachi Rail is connecting the future of mobility – helping every passenger, customer and community enjoy the benefits of more seamless, sustainable journeys. The company's pioneering technology enables more than 18bn passenger journeys every year and helps to safely transport millions of tonnes of freight.

The purpose of this role is to lead and guide the Signaling & Asset Protection System (APS) and Supervisory Control And Data Acquisition (SCADA) maintenance division into achieving the contractual maintenance goals, while he/she will also be an active member of the workforce responsible for routine, preventive and corrective maintenance, inspections, testing and reporting. The technological subsystems under the division include: Interlocking, RBC, Axle Counter, Point Machines, APS (e.g. e.g. Hot Axle Bearing Detector (HABD)/Hot Wheel Detector (HWD)/Rail Head Temperature (RHT) , Radio Frequency Identifier (RFID), Dragging Equipment Detector (DED), Weight In Motion (WIM) /Weight Impact Load Detector (WILD) etc), SCADA.
