Company: SmartCrowd

Location: United Arab Emirates

Category: healthcare-practitioners-and-technical

About SmartCrowd:

Join the revolution at SmartCrowd, where Fintech innovation meets real estate investment! We're not your average company; we're a dynamic startup with a bold vision: to become the leading crowdfunding platform in the MENA region and beyond. Our mission? To empower everyone with the opportunity to invest in real estate through fractional shares. Say goodbye to exclusivity—our digital platform opens the door for savvy investors of all kinds. If you're passionate about reshaping industries, disrupting norms, and making real estate accessible to all through technology, come aboard. Your role here isn't just essential; it's at the heart of our groundbreaking journey.

Job Summary:

SmartCrowd is seeking a passionate and innovative Full Stack Engineer to be a driving force in our accelerated journey.

As a Full Stack Engineer, your expertise in frontend and backend engineering remains critical. Your drive and adaptability will continue to lead our product engineering efforts, contributing to our hyper-growth trajectory within the dynamic FinTech landscape. You'll spearhead the resolution of intricate technical challenges, optimizing and advancing the investment process. Your role spans from refining customer onboarding experiences to elevating eKYC, investment interfaces, digital wallet management, and navigating complex integrations with multiple third-party entities—all while ensuring a seamless and captivating user experience.

Duties & Responsibilities

Contribute to the entire software development lifecycle, ensuring efficient and high-

quality processes.

Assist in maintaining a scalable, secure technology architecture, supporting the company's growth.

Collaborate with the tech team to address product and tech challenges, ensuring robust solutions.

Support integration with large, complex systems (e.g., government departments, banks) to expand platform capabilities.

Contribute to the creation and enhancement of a scalable backend, aligning with high-growth models.

Assist in providing technical direction aligned with company goals and roadmap.

Implement and experiment with emerging technologies to enhance competitive advantage.

Contribute to the enhancement of development processes and methodologies.

Assist in ensuring technology initiatives align with regulatory and industry standards.

Requirements

Demonstrable experience writing clean code.

Proficiency in Java, Spring framework, JavaScript (Node, React, React Native) for scaling fintech solutions, alongside front-end development.

Experience in AWS services (EC2, S3, Lambda, RDS) for deploying and optimizing applications in cloud environments.

Understanding of scalable, secure technology architectures for fintech scalability.

Exposure to React Native and React.js for mobile and web applications.

Familiarity with RDBMS. Knowledge of MYSQL is a plus

Experience contributing to successful web and mobile fintech products with data-driven strategies.

Ability to apply user-centric problem-solving approaches for seamless user experiences.

Analytical and problem-solving abilities relevant for tech innovation and issue resolution.

Interest and adaptability in emerging technologies for competitive advantages.

Capability to propose and implement tech-focused solutions aligning with strategic objectives.

Proficient understanding of code versioning tools, such as Git / Mercurial / SVN

Proactive in terms of sharing updates across the entire team.

Benefits

An open and collaborative company looking to develop a world-class engineering outfit.

Modern architecture and tooling - you can use the right tool for the job.

“Just enough process” - no more, no less.

More perks as we (and you) think of them.

Hiring Process:

Our recruitment process aims to be efficient, respecting your time with a total commitment of around 4 hours:

Introductory Conversation: A chance for us to get to know each other.

Technical Deep-Dive: Dive into technical aspects, showcasing your expertise.

Product Discussion: Assess your approach to product development and problem-solving.

Culture Interview: Explore your fit within our collaborative and innovative culture.

****This job is remote based, candidates based outside the UAE are encouraged to apply for this role****
