Solution Architect - Abu Dhabi UAE Ref. 005213

[Apply Now](#)

Company: Novancy One

Location: United Arab Emirates

Category: healthcare-practitioners-and-technical

We are seeking a highly skilled and innovative Senior Architect. This role offers a unique opportunity to collaborate within an international, multi-paradigm team, working on a diverse range of projects involving cutting-edge technologies such as high-performance computing, Big Data analytics, Machine Learning, 5G, and the digital transformation of governments and businesses. This position is based in Abu Dhabi, UAE. Activities :

- Technical Strategy & Roadmap Development:** Proactively participate in setting-up the technical strategy and release roadmap for the company. Proactively engage in planning and executing investments in product development and release.
- Client Consultation & Technical Discussions:** Conduct comprehensive technical discussions with clients regarding project intricacies.
- Technology Assessment & Implementation:** Evaluate disruptive and competitive technologies. Design and implement sophisticated systems requiring high performance and scalability. Establishment and upkeep of software engineering processes and best practices. Daily communication of technical matters with clients, partners, and third-party providers.
- Leadership & Team Management:** Adhere to company values in conduct. Lead multiple development teams in the design and development process. Provide technical leadership throughout project lifecycles: Architectural design, resource allocation, delegation, progress oversight, deployment coordination. Identify and address problem areas while mentoring team members on technological aspects. Engage with peers and partners on technical matters and mentor team members on technological aspects. Resolve technical disputes and making decisions regarding the tech stack.
- Continuous Learning & Integration:** Stay updated with the latest technology advancements and best practices in high performance computing, networking,

and related fields. Incorporate new technologies and practices into the team's development process as applicable. Troubleshooting & Quality Assurance: Identify and resolve technical issues related to performance and scalability. Participate in code reviews to ensure high-quality code adhering to established standards. Manage escalated developments and issues in the ticketing system and intervene to clarify any uncertainties. Requirements : Bachelor's, Master's, or technical degree in Computer Science, Physics, Mathematics, Electrical Engineering, Information Technology, Information Systems, or a related field. Other degrees will also be considered. Practical experience in implementing and maintaining industry standards concerning IP network protocols, Cybersecurity, Quality of Service (QoS), and data transmission standards (e.g., ISO 27001, 3GPP, NIST) is essential. Passion for technology. Technical Skills: C, Java 8/18, Python, TypeScript, JavaScript. Elasticsearch, Apache Cassandra, Redis/KeyDB, Apache Druid, SPARK. Spring Framework, gRPC, Protocol Buffers, React, Node.js. Docker, MLOPS tools. Multi-threading and high-performance computing. CentOS, Ubuntu. GitLab, Jira, Confluence. Typical ML libraries like scikit learn, TensorFlow, etc. Soft Skills: Proficient in communication: both verbal and written. Strong problem-solving and analytical abilities. Effective decision-making skills. Leadership and issue resolution expertise. Proficiency in team and time management. Proficiency in coaching and training. -- Novancy One, a leader in staffing and recruitment for information systems and digital transformation, is committed to equality and diversity in our hiring process. We welcome applications from candidates of all backgrounds, ensuring equal opportunities regardless of race, color, religion, gender, sexual orientation, national origin, disability, age, or veteran status.
