Responsibilities:

- Conduct thorough industry market analysis to identify trends, challenges, and opportunities.
- Analyze customer needs through target customer profiling, visits, and user map creation.
- Perform business value chain analysis, competition analysis, and demand analysis to inform strategic decisions.
- Identify and analyze the business value chain to streamline processes and enhance efficiency.

- Collaborate with regional teams to assess and improve the value chain based on market insights.
- Work closely with regional teams to identify key customers and understand their unique needs.
- Design regional solutions based on industry insights and customer-user analysis.
- Promote localization and adaptation of baseline solutions to meet regional requirements.
- Design and implement prototype projects to test and validate proposed solutions.
- Develop launch and marketing strategies for solutions, ensuring effective value transfer.
- Manage the entire life cycle of the solution, including ongoing marketing efforts, internal and external empowerment, and continuous improvement based on feedback.

Requirements

- More than 3 years of proven, relevant working experience in a similar role.
- Bachelor's degree or above in Engineering or Computer Science related majors.
- Strong system thinking and program design abilities.
- Proficient in market research, marketing planning, communication, and organizational coordination skills.
- Demonstrated expertise in a range of skills relevant to the role.
- Proficient in English speaking; proficiency in Chinese is preferred.
- Familiarity with smart business solutions such as smart city, smart transportation, smart retail, smart education, and smart energy.
- In-depth knowledge of products and solutions within the smart technology industry. #J-18808-Ljbffr
