Company: SearchPlus HR Dubai

Location: dubai

Category: other-general

About The Role As a Specialist in Oral Dental Surgeon, you will focus on diagnosing and treating intricate oral and dental conditions that require specialized surgical intervention. You will perform advanced surgical procedures such as extractions, dental implant placements, orthognathic surgeries, and bone grafting. Additionally, you will collaborate closely with other dental and medical professionals to ensure comprehensive patient care and optimal outcomes.

Responsibilities

- Evaluate patients' dental and medical history, as well as their oral and facial conditions
- Develop treatment plans tailored to individual patient needs
- Perform advanced surgical procedures such as extractions, dental implant placements, orthognathic surgeries, and bone grafting
- Diagnose and treat complex oral diseases, infections, and abnormalities
- Collaborate with other dental and medical specialists to develop comprehensive treatment plans
- Provide post-operative care, monitor patients' healing progress, and manage potential complications
- Stay updated on the latest advancements and research in the field of oral dental surgery through continuous learning and professional development

Requirements

- Dental degree and valid license to practice as a Specialist in Oral Dental Surgeon
- Proven experience in performing advanced surgical procedures in oral dental surgery
- Expertise in extractions, dental implant placements, orthognathic surgeries, and bone grafting
- In-depth knowledge of oral and maxillofacial anatomy, pathology, and surgical techniques
- Excellent communication and interpersonal skills to effectively collaborate with colleagues and provide specialized care to patients
- Detail-oriented mindset and ability to analyze complex cases and develop effective treatment plans
- Demonstrated ability to work independently and as part of a collaborative team
- Strong
