To act as the Well Operations champion to guide and provide expert support to the onshore and offshore Well Operations teams in the design and execution of complex trajectory well interventions and advanced carbonate reservoir stimulations. Responsible to monitor, evaluate and design Well Operations activities including reservoir surveillance, production testing, well integrity diagnostics, preventative maintenance, reservoir stimulation, scale removal, water and gas shut off and numerous other key activities required during the life cycle of a well. To work closely with all engineers within the Well Operations group to provide expert operational and technical support to the field or wells assigned, including rig based activity when required.

Responsibilities:

Troubleshooting and resolving IT issues in a timely manner.

Communicating with coworkers to diagnose problems.

Installing and configuring hardware and software.

Talking coworkers through the process of fixing technical issues.

Prioritizing your workload to ensure the most critical issues are resolved first.

Documenting common support procedures that coworkers can follow.

Providing support remotely when necessary.

Requirements:

Degree in computer science or information technology preferred.

Microsoft certification is advantageous.

Previous experience in a technical support role.

Experience with remote desktop applications.

Strong analytical and problem-solving skills.

Good communication skills, both written and verbal.

Excellent interpersonal skills.

#J-18808-Ljbffr
