Company: MTS OFFSHORE SURVEYING LIMITED

Location: Sharjah

Category: healthcare-practitioners-and-technical

Company Description

MTS OFFSHORE SURVEYING LIMITED is a mining and metals company located in Sharjah, with a focus on offshore surveying. This company provides high-end offshore survey services, aiding with the acquisition of underwater data to be used in industries including energy, infrastructure, and mining.

Role Description

This is a full-time hybrid role for a Surveyor, located in Sharjah, with flexibility for some remote work. The Surveyor will be responsible for collecting, analyzing, and interpreting data about underwater environments, as well as creating and maintaining maps and charts. They will also need to operate and maintain survey equipment and vehicles, and communicate findings to project managers.

Qualifications

Experience with offshore surveying, including the use of survey equipment and the collection and interpretation of data

Proficiency in survey data processing software such as Qinsy, HYPACK or EIVA

Basic knowledge of GIS and CAD software to support survey activities

Experience in project management

Bachelor's degree or higher in Marine Sciences, Geomatics or related field

Strong interpersonal and communication skills

Ability to work independently and in a team to meet project deadlines

Willingness to work in a field environment with occasional travel
