Sustainability Manager Jobs In Dubai | Jacobs

Sustainability Manager – Expo City Dubai–(MID0002CO)Your Impact:

Following the success of Expo 2020 Dubai, Jacobs joint venture's Programme Management Consultant role has been extended to cover the Expo City legacy transition and legacy.

In its role as Expo City's real estate delivery partners on this project, Jacobs Joint Venture is providing full-service consultancy including scheduling, project controls, cost and commercial management, design and delivery management, handover and contract close out within it.

Dubai's World Expo was the first time the World's Fair is hosted in the Middle East, North Africa and South Asia region attracting 25million visitors. Expo City will build on this success to create a hub for business, leisure, entertainment and living.

As a Sustainability Manager, you'll be responsible not only for the overall delivery of sustainability projects, but also for the management of the project development from conception through completion in accordance with program sustainability objectives. You will manage and provide design and construction oversight and resolve complex design and construction project related issues, disputes and disagreements. You will be responsible for ensuring not only the progress and technical performance of a project, but also the material management, schedule, cost, scope and safety of the team.

Here's What You'll Need:

As a successful candidate you will be degree qualified in either an Architectural, Engineering, Environmental or Sustainability related discipline and come with at least 8 years of industry experience, with at least 5 years of relevant experience in sustainable design

and construction.

You will have experience in engaging with external stakeholders to collaborate on sustainability, have a broad understanding of sustainability with in-depth knowledge of at least one sustainability related discipline (green building design, energy, water, waste, carbon management, etc.), and have effective client management skills.

You will come with strong working knowledge of pre-design and pre-construction, building systems/components and technology and will ideally have accreditation in Green Star, ISCA, LEED, BREEAM, NABERS and/or WELL.
