

Systems Integration Engineer-OCONUS

[Apply Now](#)

Company: CACI International Inc

Location: United Arab Emirates

Category: healthcare-practitioners-and-technical

Systems Integration Engineer-OCONUS Job Category: Information Technology Time Type: Full time Minimum Clearance Required to Start: TS/SCI with Polygraph Employee Type: Regular-Rotational Traveler Percentage of Travel Required: Up to 50% Type of Travel: Outside Continental US* * *

CACI's Advanced Solutions Group delivers industry leading Signals Intelligence exploitation and Electronic Warfare (SIGINT/EW) products that enable our nation's tactical warfighters to effectively utilize distributed grids of networked sensors, assets, and platforms to perform a variety of critical national security driven missions.

We are seeking a Systems Integration Engineer to deploy and maintain systems based out of Abu Dhabi, UAE. This is a unique opportunity for the right candidate that wants to travel, and get compensated accordingly for an OCONUS assignment. This would include:

- Generous base pay
- Housing allowance
- Education allowance
- Annual R/T trips home
- COLA adjustments

What You'll Get to Do :

Execute the research, engineering, and development of solutions to support operational systems

Develop releasable solutions in a specified timeframe and budget

Refine and enhance existing applications to best meet customer/operational requirements

Optimize legacy operational software as necessary to meet continuously evolving cyber security

Apply system level knowledge (OS and hardware) to be able to diagnose issues and provide solutions

Profile, analyze, and optimize legacy software system

More About this Role :

Work on a ground system infrastructure for our customer that provides pre-mission configuration management and post-mission data workflows to support the war fighter.

Develop automation for rapid system build and test

Help develop roadmaps to ensure proper level of support to meet evolving customer needs

Develop and maintain user and administrative documentation to meet customer contract requirements

Understanding of software life-cycle management (and tools)

Travel onsite to periodically install and test operational systems and updates

Qualifications you'll bring:

Must be a US Citizen and have a TS/SCI with Poly clearance

BS/BA degree in a related field, or equivalent experience in lieu of degree

Strong knowledge of Routing Protocol Configurations, OSI 7 Layer Model, IPv4 and IPv6, DNS, DHCP

Experience with working on a classified transport network

Experience with troubleshooting network connectivity issues

Experience in network engineering, O&M support, requirements analysis, product integration, network database baseline, and progress tracking

Knowledge of Red Hat Enterprise Linux (RHEL) or CentOS

Knowledge of configuration and troubleshooting for Cisco Adaptive Security Appliance (ASA) firewalls, and Cisco routing and switching technology

Knowledge of VMware, including software defined switching

Knowledge of cloud technologies

Possession of excellent verbal and written communication skills

Qualifications that are nice to have:

Current DoD 8570 Approved IAT II or higher baseline certification (e.g., CompTIA Security+ CE or equivalent/higher). Must be obtainable within 90 days of start

What We Can Offer You:

- We've been named a Best Place to Work by the Washington Post.
- Our employees value the flexibility at CACI that allows them to balance quality work and their personal lives.
- We offer competitive benefits and learning and development opportunities.
- We are mission-oriented and ever vigilant in aligning our solutions with the nation's highest priorities.
- For over 60 years, the principles of CACI's unique, character-based culture have been the driving force behind our success.
