Technical Program Manager, Network Acquisition and Delivery

[Apply Now](#)

Company: Oracle

Location: United Arab Emirates

Category: healthcare-practitioners-and-technical

At Oracle Cloud Infrastructure (OCI), we build the future of the cloud for Enterprises as a diverse team of fellow creators and inventors. We act with the speed and attitude of a start-up, with the scale and customer-focus of the leading enterprise software company in the world.

Values are OCI's foundation and how we deliver excellence. We strive for equity, inclusion, and respect for all. We are committed to the greater good in our products and our actions. We are constantly learning and taking opportunities to grow our careers and ourselves. We challenge each other to stretch beyond our past to build our future.

OCI Network Capacity and Planning organization is looking for a Principal Technical Program Manager (TPM) to drive our cross-organizational Network Acquisition and Delivery programs. This TPM will be responsible for the delivery of network connectivity for Oracle's rapidly expanding cloud data centers. This TPM will operate independently across our organization, partnering with other TPMs and leaders within Networking, Data Center, Region Build, Engineering and Operations. They will be accountable to ideate for and deliver on our critical network infrastructure deliveries, projects focused on process improvements and contribute to vendor business reviews. They will also be responsible for adhering to and exceeding internal interval measurement mechanisms and helping the team to improve efficiencies in the delivery process.

As a seasoned TPM you will always "put the customer first" and have the mentality of "act now and iterate" while building innovative cloud native products. You will demonstrate strong communication skills to coordinate the across teams that are either operating in silos

or don't have mature processes. Lastly, you will be expected to help mature our existing processes partnering with engineering teams and product teams.

Career Level - IC3

Manage large-scale circuit delivery projects, define milestones and success criteria, allocate time resourcefully, and deliver network capacity on-time

Own processes and timelines, partnering with engineering, region build and data-centre teams

Influence technical decisions in working with large, cross-functional teams

Lead efforts to communicate schedules, priorities, and status to all levels in the company

Identify and remove blockers for the Network Acquisition and Delivery team

Required Qualifications

Experience working with circuit delivery of various types such as lit waves, dark fiber, backbone, IP transit etc.

Strong fiberoptic infrastructure troubleshooting skills

Substantial background in large-scale networks

Bachelor's degree in Computer Science or equivalent practical experience
