Description:

Technology continues to play an increasingly large role both in our client work and how we operate within EY. Across our business, Technology professionals focus on harnessing the power of technology to unleash human potential. They seek to deliver innovative tech-based solutions and in doing so, enhance our market impact and improve service delivery.

Whether helping clients transform for a safe and sustainable future, developing tax applications, conducting forensic due diligence, building solutions for multi-client use or enabling EY to operate more efficiently, Technology professionals at EY help deliver long-term value for our clients, our business, and our people.

Responsibilities: Help the organization create and obtain value from their data and intelligence assets through a range of services and technologies

Create solutions that ingest data from a wide range of sources and formats to provide value through analysis, reporting, insights and cognitive services that learn automatically, to recommend actions, automate processes and take decisions to achieve a goal

Design, build and operate architectures, infrastructures and integration solutions that support the lifecycle management of company data assets, from acquisition to trusted consumption and monetization

Articulate information strategies that enable business transformation through value of data

and trusted intelligence at scale Information Management & Analysis is broken down into three core areas.

Data Management & Strategy

Data Architecture & Engineering
